Education

Sardar Vallabhbhai National Institute of Technology, Surat — Gujarat, India
B.Tech in Electronics and Communication Engineering (CGPA: 7.75 / 10) — *Dec 2021 - May 2025*

Experience

ClickPe (YC W'23) — Jan 2025 - Present
Position: Software Development Intern — *Surat, Gujarat*

- Developed a secure login and Direct Sales Agent Portal used by 50+ agents using the **Go/Gin** framework and **AWS Lambda** for scalable, event-driven operations.
- Provisioned infrastructure using the **Serverless**, leveraging **AWS CloudFormation** for repeatable deployments.
- Integrated **API Gateway** with custom domains, authentication, and rate limiting, including **DNS** configuration and **Route53** for domain management.
- Utilized **AWS S3** for document storage, **DynamoDB** for pages/forms, and **PostgreSQL RDS** for data storage.
- Built a **JSON-driven UI** with **React** for rendering using a low-code approach with **Form.io**, reducing development time by 60%.
- **Orchestrated** Bank Statement Analyzer and DigiLocker verification **workflows** using **Temporal**, with **webhooks** and redirect **callbacks** for seamless financial and identity verification.
- Generated API documentation using **OpenAPI 3.0** specification with interactive **Swagger UI** integration.

Aspyr — May 2024 - Jul 2024
Position: Software Development Intern — *Remote*

- Created an interview scheduling software using **Spring Boot**, automating coordination and notifications, and efficiently scheduling 70+ interviews per month.
- Implemented **JWT** and **Spring Security** for Magic Link authentication, improving user access simplicity.
- Designed and implemented an optimized **PostgreSQL** database schema for managing interviewer and interviewee data, comprising over 10 tables.
- Established a **Graylog**-based log management tool with **ElasticSearch** and **Mongo**, reducing log analysis time.

Projects

ServiceInsight | *AWS, API Gateway, CloudWatch, Serverless, ELK, Docker* — Feb 2025 - Mar 2025

- Developed and deployed end-to-end monitoring, logging, and alerting for **Serverless** applications using **AWS Lambda** functions, integrated with **API Gateway**.
- Automated infrastructure provisioning using the **Serverless Framework** with **CloudFormation**, and utilized **PostgreSQL RDS** and **S3** for data and log storage.
- Built a comprehensive observability stack with **CloudWatch Logs/Metrics** for structured logging and tracing.
- Configured **Logstash** to process logs from S3 and index them into **Elasticsearch**, with visualizations in **Kibana** and **Grafana** using data from **Prometheus**.
- Enabled system-wide monitoring with **CloudWatch Exporter** and **Prometheus**, and set up **CloudWatch Alarms** with **SNS** for alerting.
- Deployed and maintained the entire monitoring stack (**ELK**, **Prometheus**, **Grafana**) on **EC2** using **Docker Compose**, including scheduled cleanup via **EventBridge**.

City Service | *React.js, Tailwind CSS, Node.js, MongoDB, Redux* — Jan 2024 - Feb 2024

- Established a home service digital platform using the **MERN stack** and **Tailwind CSS**, connecting 500+ customers with verified service professionals across multiple categories.
- Leveraged **Redux** for scalable state management across 15+ components, improving application maintainability.
- Improved user experience through the implementation of **search functionality** and a **notification system**.

Technical Skills

Languages: Java, C++, Golang, Python, JavaScript.
Frameworks & Libraries: React.js, Redux, Tailwind CSS, Spring Boot, Spring Security, Socket.io, Node.js, Gin.
Databases & Communication: MongoDB, MySQL, DynamoDB, PostgreSQL, JPA, REST APIs, gRPC.
Cloud & Tools: AWS (Lambda, Serverless, RDS, S3, CloudWatch, Amplify), Docker, Postman, GitHub, Swagger UI.
Competitive Platforms: *Leetcode*, *Codeforces* (Max Rating: 1220), *Codechef* (Max Rating: 1615), *GFG*
CS Fundamentals: DSA, Operating System, Object Oriented Programming, Database Management System.
