EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat **Dec 2021 - May 2025**
B.Tech in Electronics and Communication Engineering (CGPA: 7.87 / 10) *Gujarat, India*

EXPERIENCE

ClickPe (YC'23) **May 2024 - Jul 2024**
Position: Software Development Intern *Surat, Gujarat*

- Developed a Direct Sales Agent Portal with a **microservices-based**, clean architecture using the **Serverless** Framework and **AWS Lambda**.
- Built a **JSON-drivenUI** with **React** for dynamic rendering using a low-code approach with **Form.io**.
- Utilized **AWS S3** for document storage, **DynamoDB** for pages/forms, and **RDS** for structured data.
- Integrated **FinBox** Account Aggregator SDK and **DigiLocker** APIs for financial and identity verification.
- Incorporated **Ignosis'** Bank Statement Analyzer as a fallback system to ensure data reliability when FinBox Account Aggregator is unavailable.

GSSoC'24 **May 2024 - Aug 2024**
Position: Open Source Contributor *Remote*

- Contributed to diverse open-source projects, focusing on bug fixes and creating impactful landing pages, signup flows, and contact us pages.
- Resolved 10+ issues on **GitHub**, improving collaboration and increasing project efficiency.

PROJECTS

Schedulify : Java, Spring Boot, PostgreSQL, React, Graylog **Dec 2024 - Jan 2025**

- Developed an interview scheduling software using the **Spring Boot** framework, automating the process of arranging and notifying interviews.
- Utilized **JWT** and **Spring Security** for Magic Link authentication, improving user access simplicity.
- Created onboarding processes and dedicated dashboards for interviewers and interviewees using **React** and **Tailwind CSS**, resulting in a increase in user engagement.
- Designed and implemented an optimized **PostgreSQL** database schema for managing interviewer and interviewee data, comprising over 10 tables.
- Established a **Graylog**-based log management tool with **ElasticSearch** and **Mongo**, reducing log analysis time.

City Service : React.js, Tailwind CSS, Node.js, MongoDB, Redux **Jan 2023 - Feb 2023**

- Established a digital platform using the **MERN stack** and **Tailwind CSS**, providing a home service solution that connects customers to service professionals.
- Leveraged **Redux** for state management across various components, enhancing website functionality.
- Improved user experience through the implementation of search functionality and a notification system.

ACHIEVEMENTS

- Solved 400+ questions on **Leetcode**, **GFG** and various other platforms.
- Reached **Pupil** status at **Codeforces**(Max Rating: 1220) and **3 stars** at **Codechef**(Max Rating: 1615).
- **Ranked 9th** out of 50+ teams in **CODEWARS**, an offline coding event hosted by **ACM** and **MINDBEND**.
- Achieved **8th place** out of 100+ teams in **DotSlash 7.0**, an offline hackathon organized by **ASHINE** and **ACM**.

TECHNICAL SKILLS

Programming: Java, C++, JavaScript.
Backend: Spring Boot, Node.js, Express.js, Serverless.
Frontend: React.js, Redux, Tailwind CSS, Form.io.
Databases: MongoDB, MySQL, DynamoDB, PostgreSQL.
Cloud & Tools: AWS (S3, Lambda, DynamoDB, CloudWatch), Docker, Postman, GitHub.
CS Fundamentals: DSA, Operating System, Object Oriented Programming, Database Management System.
