EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat **Dec 2021 - May 2025**
B.Tech in Electronics and Communication Engineering (CGPA: 7.67 / 10) *Gujarat, India*

EXPERIENCE

ClickPe (YC'23) **Jan 2025 - Present**
Position: Software Development Intern *Surat, Gujarat*

- Developed a Direct Sales Agent Portal utilizing a **microservices architecture**, leveraging the **Serverless** Framework and **AWS Lambda** for scalable, event-driven operations.
- Built a **JSON-drivenUI** with **React** for dynamic rendering using a low-code approach with **Form.io**.
- Utilized **AWS S3** for document storage, **DynamoDB** for pages/forms, and **RDS** for structured data.
- Integrated **FinBox** Account Aggregator SDK and **DigiLocker** APIs for financial and identity verification.
- Incorporated **Ignosis'** Bank Statement Analyzer as a fallback system to ensure data reliability when FinBox Account Aggregator is unavailable.

Aspyr **May 2024 - Jul 2024**
Position: Software Development Intern *Remote*

- Developed an interview scheduling software using the **Spring Boot** framework, automating the process of arranging and notifying interviews.
- Utilized **JWT** and **Spring Security** for Magic Link authentication, improving user access simplicity.
- Created onboarding processes and dedicated dashboards for interviewers and interviewees using **React** and **Tailwind CSS**, resulting in a increase in user engagement.
- Established a **Graylog**-based log management tool with **ElasticSearch** and **Mongo**, reducing log analysis time.

PROJECTS

MediSync Microservices Platform : Java, Spring Boot, Spring Cloud, Docker, Kafka, gRPC, AWS **Dec 2024 - Feb 2025**

- Engineered the Patient Service implementing **RESTful APIs** with comprehensive CRUD operations, custom validation constraints, and global exception handling utilizing **Spring Boot**'s ControllerAdvice.
- Designed and developed the Billing Service leveraging **gRPC** bidirectional streaming protocol with Protocol Buffers for low-latency, high-efficiency inter-service communication.
- Orchestrated an event-driven Analytics Service utilizing **Apache Kafka** for real-time patient data processing, implementing consumer groups with partition rebalancing for horizontal scalability.
- Implemented **JWT-based** authentication with refresh token rotation, role-based access control, and **OAuth 2.0**
- Constructed an **API Gateway** utilizing **Spring Cloud** Gateway with custom filter chains for request routing, circuit breaking, rate limiting, and security enforcement.
- Containerized the ecosystem using **Docker** with multi-stage builds and implemented Docker Compose for local development environment orchestration.
- Generated API documentation using **OpenAPI 3.0** specification with interactive **Swagger UI** integration.

City Service : React.js, Tailwind CSS, Node.js, MongoDB, Redux **Jan 2023 - Feb 2023**

- Established a digital platform using the **MERN stack** and **Tailwind CSS**, providing a home service solution that connects customers to service professionals.
- Leveraged **Redux** for state management across various components, enhancing website functionality.
- Improved user experience through the implementation of **search functionality** and a **notification system**.

TECHNICAL SKILLS

Programming: Java, C++, JavaScript.
Frontend/Backend: React.js, Redux, Tailwind CSS, Swagger UI, Spring Boot, Node.js, Express.js, Serverless.
Databases: MongoDB, MySQL, DynamoDB, PostgreSQL, JPA/Hibernate.
Cloud & Tools: AWS (Lambda, RDS, S3, CloudWatch), Docker, Postman, GitHub, JWT, Maven.
Microservices & Communication: gRPC, REST APIs, Apache Kafka, Event-Driven Architecture.
CS Fundamentals: DSA, Operating System, Object Oriented Programming, Database Management System.
